DEBABRATA DAS

+91-9957085950 debodas1333@gmail.com Github LinkedIn Website

Data-driven professional skilled in Python, SQL, and advanced analytics, with expertise in transforming complex datasets into actionable AI-driven solutions. Proven ability to optimise processes, enhance precision, and deliver measurable business impact. Passionate about leveraging data and AI to drive innovation and informed decision-making.

Skills

- Programming & Data Analysis: **Python, SQL, Data Cleaning, Data Analysis, Data Warehousing**
- Machine Learning & AI: **Large Language Models (Anthropic Claude, LLaMA, Mistral), Vector Embeddings, Data Modelling**
- Cloud & Tools: **AWS (Bedrock, S3, S3 Vector DB), FastAPI, Excel**
- Business & Research: **Company Profiling, Market Research, Data-Driven Decision Making, Cross-functional Collaboration**

Experience

FACCTUM **Feb 2024 – Present**

Data Analyst Bengaluru, India

- Supported machine learning teams by analysing model efficiency and providing insights to enhance decision-making, achieving a **20% improvement** in data-driven outcomes.
- Developed and implemented robust data collection methodologies, including **building web scrapers and data extractors** for PDFs, which improved data accuracy and completeness and **reduced data errors by 15%**.
- Utilised statistical techniques to extract actionable insights, **boosting operational efficiency by 30%**.
- Collaborated cross-functionally to drive strategic initiatives, using data-driven recommendations to optimise business processes.

ZIGRAM **Jun 2023 – Feb 2024**

Analyst Gurugram, India

- Standardized data cleansing, validation, and integration processes, **achieving 99% data accuracy** and enhancing overall data quality
- Delivered comprehensive reports and presentations for senior management, directly improving decision-making and insights
- Led a database overhaul, resulting in a **30% boost in data accessibility** and efficiency
- Established streamlined data management and optimization processes, strengthening project communication and analytics capabilities

Projects

AI Blog Generator (Internal Hackathon Project):

- Designed and developed an AI-powered blog generation platform for the Sales & Marketing department using **AWS Bedrock (Anthropic Claude 3.7 Sonnet, LLaMA 70B Instruct), AWS S3 Vector DB**, **embedding models**, and **FastAPI**.
- Engineered data ingestion pipelines to process company-specific blogs and solution documents, converting them into vector embeddings for contextually accurate and SEO-optimised content generation.
- **Developed keyword scoring and matching algorithms**, **tone-specific templates**, and an **interactive refinement system** to ensure brand-consistent, high-quality blog output.
- Built API integrations for seamless backend–frontend communication and real-time content refinement.
- Impact: **Reduced blog creation time by 80%**, enabling the production of multiple SEO-friendly blogs daily and significantly improving marketing team productivity.

Portfolio Website: (Click here)

- Developed a professional portfolio website to showcase analytics projects, featuring a dynamic UI that provides users with an engaging overview of expertise and skills.
- Highlighted data analysis and visualization projects, demonstrating technical proficiency and significantly improving user engagement.
- Integrated interactive elements to enhance user experience, encouraging deeper exploration of project details and methodologies.

Education

Assam University **Aug 2019 – Sept 2022**

Bachelor of Science with Physics Silchar, India
